## Education

STI College Alabang  
Alabang, Muntinlupa  
BS in Information Technology

## Key Skills

Bootstrap  
Java  
JavaScript  
React.js  
PHP

## Objective

As a web developer, my primary objective is to enhance the functionality and performance of web applications by writing clean, efficient code and collaborating with cross functional teams. I strive to create a user friendly and engaging online experience by effectively communicating with stakeholders, setting clear project milestones, and continuously monitoring and optimizing website performance.

## Experience

MARCH 20XX – JUNE 20XX

**Web Developer Intern** | ELDBS

MARCH 20XX – JUNE 20XX

**Web Designer Intern** | ELDBS

## Front-end Development

Involves working with HTML, CSS, JavaScript and Bootstrap to create the visual elements of a website. This includes ensuring responsive design and optimizing user experience.

## Back-end Development

Involves server-side programming, working with databases, and managing application logic. Technologies may include languages like PHP, Python and database management systems like MySQL.

## Continuous Learning

Staying updated with the latest web technologies, trends, and best practices to enhance skills and improve project outcomes.
